

Skybox to AlgoSec Migration use cases

AlgoSec equips you with the tools and services to seamlessly transition from your Skybox environment to an innovative AlgoSec solution. With AlgoSec, you can confidently unlock the full potential of your security management.

Use case 1: Migration from Skybox Firewall Assurance to AlgoSec Firewall Analyzer (AFA)

Easily migrate firewall information, including hostnames and IP addresses, into AlgoSec’s Firewall Analyzer. AlgoSec streamlines device onboarding and enhances visibility and analysis capabilities.

Migration process

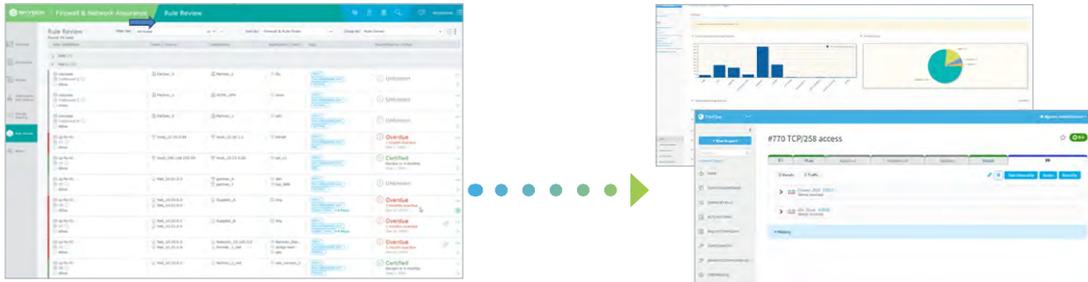

- Devices will be onboarded to AlgoSec
- A Jumpstart package (ALG-MGR-SKYB) is required
- Migration for supported device types

The AlgoSec Jumpstart offer

The following is included in the AlgoSec Jumpstart quick-deployment package:

- Central management installation – appliance/VM installation
- Device configurations
- Risk profile configuration
- Active directory integration
- System knowledge transfer

Use case 2: Migration of recertified rules from Skybox Firewall Assurance to AlgoSec FireFlow

AlgoSec FireFlow handles recertification through change request workflows. Migration converts Skybox rules into FireFlow traffic change requests for recertification.

Migration process

- Rule sets are exported from Skybox in CSV format.
- AlgoSec Professional Services creates a custom script to import them into FireFlow.
- Once imported, FireFlow's automated recertification workflows take over.

The AlgoSec professional services offer

- A tailored professional services package is available.
- Estimated effort:
 - 12 professional service days for the first 10,000 rules
 - Five additional service days per 10,000-rule increment

Use case 3: Migration of change requests from Skybox Change Manager to AlgoSec FireFlow

Retain historical visibility and auditing capabilities by migrating legacy change requests into FireFlow for centralized access and compliance tracking.

Migration process

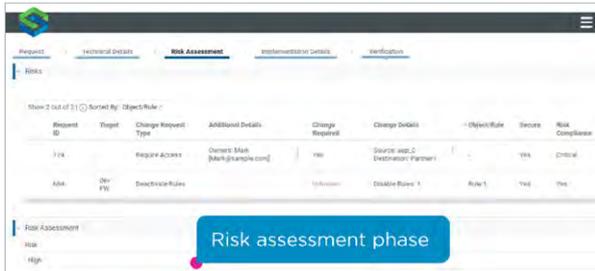

- Export change requests to Excel or via API.
- AlgoSec professional service will create a script to import these change request in FireFlow.

The AlgoSec professional services offer

Scoping is required and will depend on:

- Number of change requests
- Number of templates
- Complexity and number of custom fields

Use case 4: Migrate Skybox workflow/templates/integration from Change Manager to AlgoSec Fireflow by replication

Maintain your operational workflows and third-party integrations with ease. AlgoSec FireFlow supports the replication of customized processes from Skybox, including integrations with ITSM, IPAM, and more.

Migration process

Migrating customer templates and processes from Skybox Change Manager and/or external systems (ITSM/IPAM etc).

The AlgoSec professional services offer

Scoping is required to replicate any customized Skybox configurations, workflows, or third-party integrations.

About AlgoSec

AlgoSec, a global cybersecurity leader, empowers organizations to secure application connectivity by automating connectivity flows and security policy, anywhere.

The AlgoSec platform enables the world's most complex organizations to gain visibility, reduce risk, achieve compliance at the application-level and process changes at zero-touch across the hybrid network.

Over 1,800 of the world's leading organizations trust AlgoSec to help secure their most critical workloads across public cloud, private cloud, containers, and on-premises networks.
